

Trans-Tibial Uni-Belt with Extension Aide

Shown as **RIGHT** simply reverse all actions to create a **LEFT**

Cut each section to desired lengths. The metal loop should be attached to the long section & extend to the midline of the abdomen. Slide the alligator strap through the loop & pull both sections in opposite directions to the desired snugness. Touch the alligator strap down at the point near the contralateral hip. The extension aide is cut & attached as shown.
