

# Ischial Weight Bearing Trans-Tibial Custom System

This system includes a Narrow ML (Northwestern Style) Ischial Weight bearing section, jointed trans-tibial system with drop locks, modified FLO-TECH-TOR™-TF, 7" VCSPS™ floating (unloading) socket, and modified 9" UFOS™.

Used for cases where the trans-tibial residuum is too sensitive (or in a state of chronic delayed healing) or for normal weight bearing or in CVA or other paralysis cases.

Production and shipment times may vary.

Custom sockets and systems are made from measurements and adhere to the patented design principals established in our standard sizes.

At **FLO-TECH®** Custom sockets and systems are shipped on the same day as ordered if possible (if order is received prior to Noon Eastern Standard Time.) We also have components for all systems.
