*\*Custom orders are not returnable or refundable, except for manufacturer defect.*

Use the following sizing information for selecting APOPPS® sockets for your patient. Each of these sockets is a one-piece, polyethylene, clamshell design with anatomically trimmed overlapping sides, ideal for: accommodating bulbous, straight or conical shapes and gently reducing the residuum throughout the rehabilitation period and for weight bearing when used in conjunction with the UFOS™.

- ☞ The **FLO-TECH-TOR™** is used as a prosthetic socket and for early supervised weight bearing prosthetic management of trans-tibial amputations.
- ☞ The **VCSPS™** in conjunction with the **UFOS™** is used for preparatory prosthetic management of trans-tibial amputations when unlimited knee motion is desired.
- ☞ The **UFOS™** is an external frame outer socket used to attach the pylon and foot system. It is sized to match the **FLO-TECH-TOR™** or **VCSPS™** sockets.

*The APOPPS® Program is designed to maintain a healthy amputation throughout the rehabilitation process.*
